

ASSET MANAGEMENT

PROBLEM STATEMENT

Hexaware currently uses a variety of systems to handle and keep track of various kinds of assets. However, we are developing our application to lessen the inconvenience and difficulties brought on by the lack of a single platform to track all the assets. All of the company's assets that an employee has borrowed will be tracked by the application on a single platform. It aids the business in enhancing the system for tracking and recording the assets connected to each employee, enhancing the current system's accuracy and accountability.

TECHNOLOGY USED

- ▶ Frontend: React.js
 - ▶ Backend: Node.js, Express.js, Unit testing
 - ▶ Database: MySql
 - ▶ Authentication: JSON Web Tokens (JWT) for secure user authentication
- 
- Several white lines of varying lengths and angles are positioned in the bottom right corner of the slide, creating a modern, abstract graphic element.

USER INTERFACE HOMEPAGE SNAPSHOT

About Us

learn more about us

Welcome to Hexaware, your trusted partner in IT asset management solutions. At Hexaware, we understand the critical role that IT assets play in the success of your business. That's why we are dedicated to providing comprehensive and efficient solutions to help you manage your IT assets effectively.

Our mission at Hexaware is to empower businesses of all sizes to optimize their IT asset management processes. We strive to deliver innovative solutions that simplify asset tracking, increase operational efficiency, and reduce costs.

Our Asset management company dedicated to helping businesses thrive in the digital age. With a focus on innovation, collaboration, and excellence, we specialize in delivering tailored solutions that drive growth, efficiency, and success.

We envision a future where every business has access to innovative and reliable software solutions that propel them towards their goals. Through our expertise and passion for technology, we strive to be the catalyst for positive change and digital transformation.
